

Return Messages

Description

Error messages for the method.

Value range

There are not any messages if the parameter WAIT is not set or it is set to SPACE. If the COMMIT WORK command is not successfully executed, the system crashes.

If the parameter WAIT is set to a value, the following error message may be returned:

Type	Code	Message
------	------	---------

E	S&101	Posting could not be carried out
---	-------	----------------------------------
