

## FU BAPI\_COSTACTPLN\_POSTACTINPUT

---

### Short Text

Activity Input Planning: Posting

### Functionality

This method checks whether the activity input records can be planned correctly, then updates them.

### Example

You want to plan activity inputs from cost center 4220, activity type 110, and business process 1004210 in cost center 4210. For each one, you want to include 240 hours per year.

You can fill the tables as follows:

INDEXSTRUCTURE:

OBJECT_INDEX	VALUE_INDEX
1	1
1	2

COBJECT:

OBJECT_INDEX	COSTCENTER	ACTTYPE	CO_BUSPROC	ORDERID	WBS_ELEMENT
1	4210				

TOTVALUE:

VALUE_INDEX	SEND_CCTR	SEND_ACTIVITY	SENBUSPROC	QUANTITY_FIX...
1	4220	110		240
2			1004210	240

The system fills the document header accordingly.

### Parameters

HEADERINFO  
 DELTA  
 INDEXSTRUCTURE  
 COBJECT  
 PERVALUE  
 TOTVALUE  
 RETURN

### Exceptions

### Function Group
