

Switch to Simulation Mode for BAPIs That Write Data

Description

When this indicator is set, the system starts the plan data transfer as a test run.

Value range

- The indicator is set ("X")

The plan data is **not** transferred. The system runs checks and reports errors that would have occurred during an update run.

- The indicator is not set (" ")

If no errors occur, the plan data is transferred.

Default

In the standard system, this indicator is **not** set.
