

Capacity

Definition

Field receiving a monthly value of plan capacity for an activity type in a cost center area.

Planning

Use

To plan the maximum possible output of a cost center with full use of all the available resources.

Procedure

If you create or change the activity type capacity in cost center planning, you must define the corresponding field in the planning layout.

If the corresponding field in the planning layout is not defined, the activity type capacity in cost center planning is displayed only.

Note

This field group is posted only in planning.
