

Document Type in Purchase Requisition

Definition

This authorization object enables you to restrict the maintenance of **purchase requisitions** via the document type.

Defined fields

The authorization object comprises two fields:

- Document type
- Activity

The various authorizations for this object thus stipulate for which document types and via which activity requisitions can be processed.

Possible activities include "Display", "Create", "Change", etc.

Example

User A may create, change and display all document types.

Relevant authorization: document type '**', activities '1-3'.

On the other hand, user B may only display a certain document type (for instance, requisitions).

Relevant authorization: document type 'NB,RV', activity '3'.
