Item Data

Description

The table contains the purchase requisition item data.

For more information on the individual parameter fields, see the data element documentation in the ABAP Dictionary.

At least the following data is required:

- Item counter (field PREQ_ITEM)

- Material number (field MATERIAL)
  The following can also be passed on as an alternative to the material number:

  - Material group (field MATL_GROUP) and

  - Short text (field SHORT_TEXT) and

  - Unit of measure (field PREQ_UNIT) and

  - Price (field PREQ_PRICE) and

  - Purchasing group (field PUR_GROUP)

  If the material number is passed on, the material group, the short text etc., are adopted from the material master record.

- Requested quantity (field PREQ_QTY)

- Requested date (field DELIV_DATE always in the format YYYYMMDD) and date category (field DEL_DATCAT (internal representation, e.g. 1 for current date) or DEL_DATCAT_EXT (external representation, e.g. T for current date))

- Document type for purchase requisitions (field DOC_TYPE)

- Plant (field PLANT)
