Services

Description

The table contains the services and service outlines of the purchase requisition.

The marking of a line as an outline line is carried out via the field OUTL_IND. The assignment of service lines to the outline lines is carried out via the fields PCKG_NO (of the service line) and SUBPCKG_NO (of the outline line).

The hierarchy of the outline is formed via the fields LINE_NO and HI_LINE_NO. The field HI_LINE_NO refers to the field LINO_NO of the hierarchically superior outline level.
