## Purchasing Organization in Purchase Requisition

## Definition

This authorization object enables you to restrict the maintenance of **purchase requisitions** via the purchasing organization.

## Defined fields

The authorization object comprises two fields:

- Purchasing organization

- Activity

The various authorizations for this object thus stipulate for which purchasing organizations and via which activity requisitions may be processed.

Possible activities include "Display", "Create", "Change", etc.

## Example

User A may create, change and display documents for all purchasing organizations.

Relevant authorization: purchasing organization '*', activities '1-3'.

On the other hand, user B may only display documents for one particular purchasing organization.

Relevant authorization: purchasing organization '1234', activity '3'.
