FU BAPI_PROJECTDEF_GETDETAIL

_____

Short Text

Read detailed information for the project definition

Functionality

Using this method, you can read detail information about the project definition.

Notes

Obligatory import parameters are the external and internal keys CURRENTEXTERNALPROJE and CURRENTINTERNALPROJE of the project definition. One of these two keys can remain at initial.

The system reads parameters contained in the structure BAPI_PROJECT_DEFINITION_EX.

Messages are returned in the return parameter. You can find the return values and their meanings in the documentation about this parameter.

Further information

For more information, see the SAP Library under **PS Project System - Work Breakdown Structure**.
