Plant in Purchase Order

Definition

This authorization object enables you to restrict the maintenance of **purchase orders** via the plant.

Defined fields

The authorization object comprises two fields:

- Plant

- Activity

The various authorizations for this object thus stipulate for which plants and via which activity purchase orders may be processed.

Possible activities include "Display", "Create", "Change" etc.

Example

User A may create, change and display documents for all plants.

Relevant authorization: plant '*', activities '1-3'.

On the other hand, user B may only display documents for a particular plant.

Relevant authorization: plant '0001', activity '3'.
